(d) Inspection/Acceptance. The Contractor shall tender for acceptance only those items that conform to the requirements of this contract. The Government reserves the right to inspect or test any supplies or services that have been tendered for acceptance. The Government may require repair or replacement of nonconforming supplies or reperformance of nonconforming services at no increase in contract price. The Government must exercise its postacceptance rights--

(1) Within a reasonable period of time after the defect was discovered or should have been discovered; and

(2) Before any substantial change occurs in the condition of the item, unless the change is due to the defect in the item.

(e) Excusable delays. The Contractor shall be liable for default unless nonperformance is caused by an occurrence beyond the reasonable control of the Contractor and without its fault or negligence, such as acts of God or the public enemy, acts of the Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, unusually severe weather, and delays of common carriers. The Contractor shall notify the Contracting Officer in writing as soon as it is reasonably possible after the commencement of any excusable delay, setting forth the full particulars in connection therewith, shall remedy such occurrence with all reasonable dispatch, and shall promptly give written notice to the Contracting Officer of the cessation of such occurrence.

(f) Termination for the Government's convenience. The Government reserves the right to terminate this contract, or any part hereof, for its sole convenience. In the event of such termination, the Contractor shall immediately stop all work hereunder and shall immediately cause any and all of its suppliers and subcontractors to cease work. Subject to the terms of this contract, the Contractor shall be paid a percentage of the contract price reflecting the percentage of the work performed prior to the notice of termination, plus reasonable charges that the Contractor can demonstrate to the satisfaction of the Government, using its standard record keeping system, have resulted from the termination. The Contractor shall not be required to comply with the cost accounting standards or contract cost principles for this purpose. This paragraph does not give the Government any right to audit the Contractor's records. The Contractor shall not be paid for any work performed or costs incurred that reasonably could have been avoided.

(g) Termination for cause. The Government may terminate this contract, or any part hereof, for cause in the event of any default by the Contractor, or if the Contractor fails to comply with any contract terms and conditions, or fails to provide the Government, upon request, with adequate assurances of future performance. In the event of termination for cause, the Government shall not be liable to the Contractor for any amount for supplies or services not accepted, and the Contractor shall be liable to the Government for any and all

Technical Data

Electrical Generator System for small craft use

Specifications:

The electrical generator system specified will be used to provide power for the operation of a Remotely Operated Vehicle (ROV) from a Rigid-Hull Inflatable Boat (RHIB) or similar small craft. The required specifications noted are equal in importance.

Fuel – Must use Diesel fuel. Gasoline is not permitted aboard ships, and this generator will reside on a Navy ship. (Objective is for fuel tank made of non-metal.) Must be capable of using synthetic oil in crankcase.

Power – Provide 6kW power output (5.5kW continuous), single-phase, 120/240 Volt

Weight – May be no more than 300 pounds, dry. This includes sound-quieting structures. This does not include fuel and battery weight for electric start units.

Dimensions – Must be no larger than 30” L x 26” W x 26” D (2.5 feet long with roughly 2 square-foot cross section). This includes sound-quieting structures.

Runtime – Must operate under load for target of 10 hours and threshold of 9 hours without refueling.

Sound – Must produce sound level not to exceed 75 dB at 1 meter. This corresponds to MIL STD 1474 for unlimited duration exposure work, including occasional radio or telephone use nearby.

Enclosure - Unit must be enclosed to assist in the suppression of sound and the prevention of salt water spray from contacting and corroding critical generator parts. Open frame designs are not acceptable. Enclosure must be corrosion-resistant for blowing sea spray. Generator should be able to operate without problems in seawater of a depth of 3 inches, i.e. a sealed bottom. Enclosure should be vented as necessary, using fan if required, and should preclude the entrance of salt water spray or rain through the vents.

Supportability – Units must have local representation for supportability in the nearby area (Washington DC)

Safety and Standards – Generator must meet specifications as provided in ABYS document E-11 “AC & DC Electrical Systems on Boats,” for connectors and safety

features. This standard is on order from ABYS by the Automation Technology Group (Code 641) as of 22 JUL 2004 and will be made available to manufacturers of interest as requested.

Interested vendors shall provide a detailed list of how well their product will meet each design specification. They shall provide a delivery schedule in their best estimation. All units must be delivered by 29 October 2004, with a strong emphasis on the delivery of 2 units before 24 September 2004.
