October 28, 1992

Dear Mr. Richard Metrey:

It is with the greatest pleasure that we inform you that the judges have selected your nominated project as a 1992 Federal Leadership Award winner. This award recognizes those federal information systems projects that helped improve the government significantly, in one or more of the following three ways:

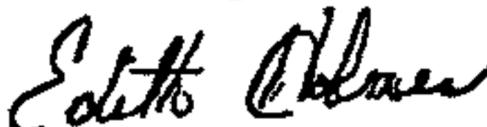

1. They have had a significant, positive impact on mission effectiveness.
2. They have tangibly improved the quality of service provided to the public.
3. They substantially decreased the costs of government operation without harming mission effectiveness.

Now that the selection has been made, several details need to be addressed. A form is attached requesting answers to a few important questions. Please complete the form and FAX it back to us within three days.

It is our goal that the awards program will underscore and make known your project's success and allow your success to contribute to more effective use of information systems throughout the government community. The announcements and events surrounding the awards program are designed to make that possible.

Once again, please accept our sincere congratulations.

Sincerely,

Edith Holmes and Alan Paller

Recognizing the federal projects and programs that have made exceptional contributions to mission effectiveness, cost-effectiveness,
